### Description

This Standard sets out recommendations for the preparation of plans for architectural work.

### Scope

The first two sections, taken with Part 101 of NZS/AS 1100, provide a common method for representation of buildings and building components.

Section 3 deals with levels and gradients, and Section 4 with conventions for doors, windows and

miscellaneous other features.

Section 5 gives recommendations for the representation of materials by colouring and hatching.

Appendices give further information on cross-referencing, dimensioning by coordinates and the use of grids.
