### Description

This Standard provides design values of permanent, imposed and other actions to be used in the limit state design of structures and members. It is intended to be used in conjunction with AS/NZS 1170.0.

Other actions covered include liquid pressure, ground water, rain water ponding and earth pressure.

### Scope

This Standard specifies permanent, imposed, static liquid pressure, ground water, rainwater ponding and earth pressure actions to be used in the limit state design of structures and parts of structures.

For assistance with locating previous versions, please contact the information provider.
