Description

This Standard intended for use in conjunction with AS/NZS 1328.1, this Standard provides detailed guidance for production of glulam. A set of stress grades is given for design purposes to simplify the use and installation of graded material. Guidelines are also provided for quality control, third party certification and for establishing structural properties.

Scope

This multi-purpose document is published as a companion document to AS/NZS 1328:Part 1. The information provided is informative, it is provided by way of advice only. It serves the following roles.

It provides guidelines for the production and installation of glued laminated timber (glulam) meeting the performance requirements of AS/NZS 1328:Part 1. Although compliance with the recommendations contained therein will usually produce satisfactory glulam members, complete documentation of all processes is not possible, no warranty can be given by Standards Australia and/or Standards New Zealand that this will actually occur. It is the responsibility of the specifiers, producers and users of glulam products to select, manufacture and install the product in such a way that it meets the performance requirements of AS/NZS 1328:Part 1.

It provides guidance on unified member descriptions for glued laminated timber products directed at assisting producers and

users in specifying the product in an unified manner.

Table of Contents

Section 1 Scope And General

1.1 Scope

1.2 Referenced Documents

1.3 Definitions

1.4 Member Descriptions

1.5 Materials

Section 2 Manufacturing Recommendations

2.1 End Joints

2.2 Proof Testing

2.3 Edge Joints

2.4 Preparation And Machining

2.5 Assembly

2.6 Finishing

2.7 Protection, Handling And Installation

2.8 Claims And Marking

Section 3 Qualification Procedures

3.1 Qualification Testing

3.2 Qualification Requirements For Strength And Stiffness Properties

3.3 Qualification Requirements For Glueline Integrity

Section 4 Process (Production) Control

4.1 General

4.2 Strength Targets For Daily Quality Control Of End Joints

4.3 Routine Requirements For Glue Line Integrity

4.4 Interpretation Of Routine Test Data And Observations
