Description

This Standard sets out test procedures for a method of test for determining the smoke leakage through doors and shutters.

This Standard is based on but not equivalent to ISO/CD 5925-1.

Scope

This Standard sets out a method to measure the leakage of cold and warm smoke from one side of a door assembly to the other under the specified test conditions.

The test can be applied to door and shutter assemblies of different types intended for purposes of controlling the passage of smoke in case of fire and of providing fire resistance.
