AS/NZS 1605.4:2018 Methods for sampling and analysing timber preservatives and preservative-treated timber - Part 4: Analysis methods for determination of preservative solution concentration

[View on Information Provider website](#)

Abbreviation

AS/NZS 1605.4:2018

Valid from

22/03/2018

Information provider

Standards New Zealand

Author

Standards New Zealand, Standards Australia

Information type

New Zealand Standard

Format

PDF

Description

This Standard specifies analysis methods for the determination of preservative solution concentration. Analytical procedures for the determination of specific preservative components are given for oil-borne and waterborne preservatives.

Calculations are provided for determining compliance with relevant standards, including the AS/NZS 1604 series and NZS 3640.

This Standard is intended to be read in conjunction with the AS/NZS 1604 series, NZS 3640 or the relevant Standard to which timber is claimed to have been treated, and AS/NZS 1605.1. The preservatives incorporated in the AS/NZS 1604 series are required to be accompanied by analytical methods for their determination, which are incorporated in the AS/NZS 1605 series.
