Information type

Determination

Format

PDF

---

### Description

The application arose from the refusal by the territorial authority to issue a code compliance certificate for a 7-year-old house, unless changes were made to its monolithic cladding system.

The matters to be determined were:

1. Whether the monolithic wall cladding as installed to the timber-framed external walls, columns and beams of the house, complied with the Building Code;
2. Whether certain building elements, which have 5 and 15-year durability requirements, complied with clause B2 of the Building Code considering the time that had elapsed since the elements were constructed.

For assistance with locating previous versions, please contact the information provider.
