---

**Description**

The dispute for determination was whether the territorial authority's decision to decline to issue a code compliance certificate for new cladding to part of an existing house because it was not satisfied that the cladding to the walls of the alterations complied with either the building consent or with clause E2 External Moisture and clause B2 Durability of the Building Code was correct.

The question to be determined was whether the wall cladding as installed to some of the walls of the built complied with the Building Code (see sections 177 and 188 of the Act).
