Description

This standard specifies methods for handling, storage, installation, testing and commissioning of polyethylene (PE) pipelines, above or below ground, for pressure and non-pressure applications conveying liquids.

Scope

This Standard sets out methods for handling, storage, installation, testing and commissioning of polyethylene (hereinafter referred to as PE) pipelines, above or below ground, for both pressure and non-pressure applications conveying fluids.

This Standard applies to PE pipe systems that carry liquids under either pressure or gravity flow situations and the components of which comply with, but are not limited to, the following:

- (a) AS 2698.2 PE rural pipe;
- (b) AS/NZS 4129 Fittings for PE pipes for pressure applications;
- (c) AS/NZS 4130 PE pipes for pressure applications;
- (d) AS 4176 Polyethylene/aluminium and cross-linked polyethylene/aluminium macrocomposite pipes for pressure applications;
- (e) AS/NZS 4401 PE pipe for soil and waste discharge;
- (f) AS/NZS 4798(Int) PE maintenance shafts;
- (g) AS 4799 Underground installation within railway boundaries; and
- (h) AS/NZS 5065 PE and PP pipes for drainage and sewerage.
