Description

This Standard describes procedures for the initial evaluation and daily quality control requirements necessary to ensure that timber has the structural properties claimed for it. The procedures apply

both to timber that is visually and machine stress graded.

Scope

This Standard describes procedures for the initial evaluation and daily quality control requirements necessary to verify that timber has the structural properties claimed for it. The procedures apply to timber that is both visually and machine stress graded. A suitably qualified organization shall carry out the initial evaluation to establish the particular grades of timber a mill is capable of producing. The same, or another, suitably qualified organization shall undertake audits of the mills daily quality controls to ensure timber continues to be produced to the claimed grades. The adequacy of the suitably qualified organizations needs to be ascertained but is outside the scope of this Standard.
