NZS 4104:1994 Seismic restraint of building contents

[View on Information Provider website](#) [{{ linkText }}](#)

Abbreviation

NZS 4104:1994

Valid from

21/12/1994

Information provider

Standards New Zealand

Author

Standards New Zealand

Information type

New Zealand Standard

Format

PDF

Description

This Standard aims to reduce the risk of injury to people and ensure access within a building after an earthquake by securing building contents.

The second aim is to reduce the risk of damage to building contents.

This standard provides the basis for the design for restraints and provides sketches of many simple, practical details for a range of common items including computer equipment, storage racks, cabinets, ornaments, appliances etc.

It is applicable to items which are required to survive an earthquake to be available to rescue and recovery services to businesses and general public. Applies only to items less than 300 kg in weight.

For assistance with locating previous versions, please contact the information provider.
