Description

This Standard specifies requirements for concrete interlocking roofing tiles of a general type and for their associated accessory tiles. Establishes minimum standards for fit and finish, for quality of materials used in manufacture and for dimensional requirements related to side lap and location of fixings, without restricting overall design or size of tiles and accessories. Also specifies requirements for laying and fixing to specified timber battens.

Scope

This Standard applies to concrete interlocking roofing tiles of the general type shown in figure 1 and to their associated accessory tiles and also to the laying and fixing thereof.
