Description

This Standard specifies the general aspects of pipes and joints made of oriented unplasticised poly(vinyl chloride) (PVC-O) for piping systems intended to be used underground or above-ground where not exposed to direct sunlight, for water mains and for services, for pressurised sewer systems and for irrigation systems.

Adopted with national modifications from ISO 16422:2014.

For assistance with locating previous versions, please contact the information provider.
