## AS/NZS 4445.1:1997 Solar heating - Domestic water heating systems - Part 1: Performance rating procedure using indoor test methods

[View on Information Provider website](#)

### Abbreviation

AS/NZS 4445.1:1997

### Valid from

04/01/1997

---

### Information provider

Standards New Zealand

### Author

Standards New Zealand, Standards Australia

### Information type

New Zealand Standard

### Format

PDF

---

### Cited By

---

### Description

This Standard provides an indoor test method for rating solar domestic water heating for thermal performance under benchmark conditions.

Identical to and reproduced from ISO 9459.1:1993.

### Scope

International Standard ISO 9459 has been developed to help facilitate the international comparison of solar domestic water heating systems.

Because a generalized performance model which is applicable to all systems has not yet been developed, it has not been possible to obtain an international consensus for one test method and one standard set of test conditions. It has therefore been decided to promulgate the currently available simple methods while work continues to finalize the more broadly applicable procedures. The advantage of this approach is that each part can proceed on its own.

For assistance with locating previous versions, please contact the information provider.

### Notes/comments

This Standard was reconfirmed in New Zealand on 1 May 2013
