Standards New Zealand

Author

Standards New Zealand, Standards Australia

Information type

New Zealand Standard

Format

PDF

Description

This Standard sets out minimum requirements for the design of structural members cold-formed to shape from carbon or low-alloy steel sheet, strip, plate or bar not more than 25 mm in thickness and used for load-carrying purposes in buildings.

It is also applicable for structures other than buildings, provided appropriate allowances are made for dynamic effects.

Scope

This Standard does not apply to the design of structures subject to brittle fracture.

For assistance with locating previous versions, please contact the information provider.
