## Description

AAMA 2604-13 specification describes test procedures and performance requirements for high performance organic coatings applied to aluminum extrusions and panels for architectural products.

In this version, an appendix was added describing differences in test procedures and performance requirements for AAMA 2604 for High Performance Organic Coatings, applied on a coil coating line, to aluminum architectural products.

**For assistance with locating previous versions, please contact the information provider.**

## Notes/comments

SNZ TS 3404:2018 cites AAMA 2604-05, which is not currently available online. We have provided you with a link to this more recent version for your information only.
