Anchor capacity at concrete slab floor edges

[View on Information Provider website](#)

Valid from

01/04/2010

Information provider

Ministry of Business, Innovation and Employment

Information type

Section 175 guidance

Format

Website

Description

Care is needed to ensure appropriate anchors are used when they are located close to the edge of slabs, particularly when the edge of the slab is formed by using masonry header blocks.

Designers should check that minimum edge distances required can be achieved and that loads do not exceed the recommendations provided below.

For assistance with locating previous versions, please contact the information provider.
