Format
PDF

Description

IKO Asphalt Roof Shingles are fibreglass reinforced surfaced with mineral chips with a ceramic coating. They are available in the following series types: Dynasty, Nordic, Cambridge and Marathon Plus AR.

The shingles and flashing accessories form a roofing system when installed over a plywood substrate and roofing underlayment.

Scope

IKO Asphalt Roof Shingles have been appraised as a roof cladding for buildings within the following scope:

- the scope limitations of NZBC Acceptable Solution E2/AS1, Paragraph 1.1, with regard to floor plan area and building height; and,
- constructed with timber roof framing and plywood sheathing complying with the NZBC; and,
- where the roof slope is 9.0° or greater; and,
- situated in NZS 3604 Wind Zones up to and including Extra High.

The system must be installed in accordance with the Technical Literature by a IKO Industries Ltd. trained and approved installer.
