Sarnafil Green Roof Waterproofing System

[Download this resource \(PDF, 231KB\)](#)

Abbreviation

Appraisal number 902

Valid from

22/01/2016

Information provider

BRANZ Limited

Information type

BRANZ Appraisal

Format

PDF

Description

The Sarnafil Green Roof Waterproofing System is a ballasted green roof for concrete roof structures incorporating loose laid Sarnafil membranes and insulation board.

Scope

The Sarnafil Green Roof Waterproofing System has been appraised for use as a green roof on buildings within the following scope:

- with substrates of suspended reinforced concrete; and,
- with each structure the subject of specific structural engineering and weathertightness design.

The design and construction of the substrate and movement and control joints is the responsibility of the building designer and building contractor.

The design and installation of the drainage board, filter sheet and ballast is the responsibility of the green roof contractor and is outside the scope of Appraisal 902 (2016).

The Sarnafil Green Roof Waterproofing System must be installed by Sika (NZ) Ltd approved applicators.

For assistance with locating previous versions, please contact the information provider.
