Description

This Standard sets out a method for determining the indirect tensile strength of standard concrete cylinders, prepared in accordance with AS 1012.8.1.

Scope

This Standard sets out a method for determining the indirect tensile strength of standard concrete cylinders, prepared in accordance with AS 1012.8.1. NOTE: This Standard may involve hazardous materials, operations, and equipment. This Standard does not purport to address all of the safety problems associated with its use. It is the responsibility of the user of this Standard to establish appropriate safety and health practices and to determine the applicability of regulatory limitations before use.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

Standard reconfirmed 24/10/2014
