### Description

This standard sets out the method for determining the compressive strength of concrete test specimens prepared in accordance with the provisions of AS 1012.8, AS 1012.14 or AS 1012.19.

### Note:

- This standard may involve hazardous materials, operations, and equipment.
- The standard does not purport to address all of the safety problems associated with its use.
- The user of this standard should establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.

For assistance with locating previous versions, please contact the information provider.

### Notes/comments

This Standard is referenced by AS/NZS 1546.1:2008 in regard to septic tanks.
