Description

This Standard specifies constructional requirements for water containers (shells) made of composite materials, viz. steel with a copper or copper alloy insert (inner liner), or steel with a bonded inner lining of vitreous enamel or of plastics material. Gives recommendations on maximum water temperatures, specifies methods of testing the quality of inner linings, and also routine and type test schedules.

Scope

This Standard specifies requirements for water heaters with composite shells made from steel and protected as follows:

- (a) With a metallic insert.
- (b) With a bonded vitreous enamel lining.
- (c) With bonded plastics lining.
