AS 1167.1-1993 Welding and brazing - Filler metals - Filler metal for brazing and braze welding

[View on Information Provider website](#) [{{ linkText }}](#)

Abbreviation

AS 1167.1-1993

Valid from

17/05/1993

Information provider

SAI Global

Author

Standards Australia

Information type

Australian Standard

Format

PDF, Hard copy

Cited By

[This resource is cited by 3 documents \(show Citations\)](#)

Description

This Standard specifies the chemical composition and approximate melting ranges of 29 types of brazing alloys grouped as silver brazing, copper-phosphorus brazing, copper brazing, and aluminium brazing alloys. A uniform system of colour coding for the purposes of identification is included together with a table of the equivalent British, American, German and ISO designations.

Scope

This Standard specifies requirements for filler metals in all forms for brazing and braze welding processes. NOTE: In this Standard, the term brazing is used to imply both processes.
