### Description

This Standard applies to zinc metal in ingot form made from ore or other material by a process of distillation or by electrolysis. It provides for three grades, viz. Zn 99.99 (Special High Grade), Zn 99.95 (High Grade) and Zn 98.5 (Prime Western).

### Scope

This standard specifies requirements for three grades of zinc metal in ingot form made from ore or other material by a process of distillation or by electrolysis. Note: Guidelines to purchasers on requirements that must be specified by the purchaser and those that must be agreed at the time of enquiry and/or order are given in Appendix A
