AS 1302-1991 Steel reinforcing bars for concrete

View on Information Provider website {{ linkText }}

Abbreviation

Citations

AS 1302-1991

Valid from

11/02/1991

Information provider

SAI Global

Author

Standards Australia

Information type

Australian Standard

Format

PDF, Hard copy

Cited By

This resource is cited by 1 document (show Citations)

Description

This Standard specifies requirements for plain and deformed hot-rolled bars for use as reinforcement for concrete. It applies to reinforcement supplied in straight lengths or in coil form.

The following significant changes to the previous edition have been made: fabrication requirements have been amended to comply with AS 3600 and tolerances on straightness of reinforcing bars have been added.

Scope

For coiled material, the requirements apply to the straightened product.

Notes:

- For 'Purchasing Guidelines', see Appendix A.
- For 'Means for demonstrating compliance with this Standard', see Appendix B.
- For welding of bars complying with this Standard, see AS 3600 and AS 1554.3.
- This Standard is not applicable to prestressing steels.
