Description

This Standard specifies requirements for cold-finished carbon steel and carbon-manganese steel bars produced by cold drawing, cold-rolling, peeling, machining and polishing, precision grinding or cold sizing, to specified chemical composition only or to specified chemical composition and mechanical properties, intended for general engineering purposes.

Scope

The Standard applies to steel supplied to specified chemical composition only or to specified chemical composition and mechanical properties. It permits the addition of elements such as boron and micro-alloying elements for the achievement of special properties.

Notes:

1. Advice and recommendations on information that should be supplied by the purchaser at the time of enquiry and order are given in Appendix A.
2. Alternative means for determining compliance with this Standard are given in Appendix B.
