SAI Global

Author

Standards Australia

Information type

Australian Standard

Format

PDF, Hard copy

Cited By

[This resource is cited by 1 document \(show Citations\)](#)

Description

This Standard specifies the minimum design and performance requirements and methods of test for optical beam smoke detectors used in automatic fire detection and alarm systems. These detectors generate a fire alarm signal when smoke from a fire partly obscures the light path between the beam emitter and beam receiver units.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

Standard reconfirmed 8 July 2016
