AS 1685-1984 Plastics pipes and fittings for gas reticulation - Polyethylene compound for manufacturing (Supersedes AS 1685:1974)

[View on Information Provider website](#)

Abbreviation

AS 1685-1984

Valid from

11/05/1984

Information provider

SAI Global

Author

Standards Australia

Information type

Australian Standard

Format

PDF, Hardcopy

Description

This standard specifies composition and test requirements. Appendices cover determination of thermal oxidative stability, weathering resistance, dispersion of pigment, sustained pressure test, resistance of pipe to internal pressure at elevated temperature and chemical resistance.

Scope

This standard specifies requirements for polyethylene compound suitable for making polyethylene pipe and fittings for gas reticulation.

Note: Advisory information on alternative methods of determining compliance of a lot with this standard is given in Appendix A.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

Note: NZS 7646:1978 cites AS 1685:1974 'Polyethylene compounds for the manufacture of gas pipes and fittings' in relation to piped services. The 1974 edition of AS 1685 is no longer available online and has been superseded by AS 1685:1984.
