Description

This standard sets out requirements for the installation of fixed and flued domestic-type oil-burning appliances of up to 60 kW thermal input rate, together with their associated oil fuel supply systems, in domestic buildings, and in other buildings. NOTES: 1. For requirements for the design and construction of oil-heating appliances, see AS 1690 and AS 2078. 2. For recommendations on water heater installation details not covered by this standard, including plumbing, see AS 1529.
