Description

This Standard sets out requirements for power-operated service lifts.

Scope

This standard sets out requirements for power-operated service lifts of the types listed in Clause 2.2 and intended for operation under any of the following conditions:

- (a) Rated car speed not more than 1 m/s.
- (b) Rated load more than 12 kg.

Note: Lifts required to carry a load in the range 12 kg to 50 kg are designed for and rated at 50 kg, because of the possibility of a person standing on the roof.

- (c) Internal car volume more than 0.06 m³.

This standard is complementary to AS 1735.1 and the relevant requirements of AS 1735.2, but the requirements of this standard take precedence over corresponding requirements in those standards.
