### Description

This standard covers the signs used for controlling vehicular and pedestrian traffic on the road. It defines the sign classifications, specifies the numbering system used and sets out the basic design of signs in terms of colour and shape codings. It provides an illustrated index of all signs and sign types which have a standard sign number, and includes sign sizes and reference to other standards in this series which cover usage of each sign.

### Scope

### Notes:

1. Pavement markings for general purposes are specified in AS 1742.2. Where special pavement markings are specified, e.g. for bus lanes, these are given in the Standard which relates to that particular traffic situation.
2. Requirements for traffic signals are specified in AS 1742.14.
3. Detailed specifications for the design and manufacture of signs are given in AS 1743.
