Description

This Standard specifies requirements for welded stainless steel tubes in a range of nominal sizes from 10 to 100 mm. Details of material requirements, dimensions, testing and marking are included. The tubes are suitable for connection by means of capillary or compression type fittings.

Scope

This specification applies to welded stainless steel tubes for use in plumbing installations, in nominal sizes 10 mm up to and including 100 mm, and suitable for connection by means of capillary fittings complying with AS 1585, Capillary Fittings for Use in Water Supply and Hot Water Services, and by compression fittings complying with AS 1645, Copper Alloy Compression Fittings for Use in Water Supply and Hot Water Services.
