Description

This standard is an adoption with national modifications and is reproduced from ISO 6507-1:1997.

It specifies the method of Vickers hardness test for the three different ranges of test force for metallic materials.

The Vickers hardness test is specified in this part of ISO 6507 for lengths of indentation diagonals between 0.020 mm and 1.400 mm.

For assistance with locating previous versions, please contact the information provider.
