Description

This Standard specifies flexible travelling cables with copper conductors, in circular or flat configuration, intended for use in power, control, lighting, indicator, telecommunications or other similar circuits in electric lifts, at a voltage not exceeding 250/440 V or 250 V.

Scope

This standard applies to flexible travelling cables with copper conductors, with or without support members, in a circular or flat configuration intended for use in power, control, lighting, indicator, telecommunications and other similar circuits in electric lifts at a voltage not exceeding 250/440 V or 250 V.

Note: Purchasing guidelines are contained in Appendix C.
