Description

This standard describes a method for the quantitative analysis of binary mixtures of mixtures of acrylics, certain modacrylics or certain chlorofibres and certain other fibres using dimethylformamide as a solvent for the acrylic, modacrylic or chlorofibre.

Scope

For assistance with locating previous versions, please contact the information provider.

Notes/comments

AS/NZS 4859.1:2002 cites this standard with reference to the material properties of textiles used for thermal insulation.
