Description

This Standard sets out general requirements for methods for the quantitative analysis of binary and ternary textile fibre mixtures after identification of their individual components.

Scope

Appendix A lists the values of the allowances for moisture and other matter to be used in connection with the analysis specified.

The procedures to be followed for the analysis of ternary mixtures are tabulated in Table 1.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

AS/NZS 4859.1:2002 cites this standard with reference to the material properties of textiles used for thermal insulation.
