Description

This Standard covers electrodes for self-shielded and gas shielded automatic or semi-automatic arc welding.

It also provides a coherent system of classification based on the method of construction, recommended welding position, shielding gas requirements, and weld metal properties.

The Standard specifies the properties and requirements for the manufacture of the electrodes and gives the methods of test. A comprehensive guide to the electrodes and other useful information are given in an appendix.

For assistance with locating previous versions, please contact the information provider.
