## AS 2331.1.3-2001 Methods of test for metallic and related coatings - Method 1.3: Local thickness tests - Magnetic method

[View on Information Provider website](#)

### Abbreviation

AS 2331.1.3-2001

### Valid from

19/06/2001

---

### Information provider

SAI Global

### Author

Standards Australia

### Information type

Australian Standard

### Format

PDF

---

### Cited By

[This resource is cited by 3 documents \(show Citations\)](#)

### Description

This Standard specifies the method of using coating thickness instruments of the magnetic type for non-destructive measurements of the thickness of non-magnetic coatings (including vitreous and porcelain enamel coatings) on magnetic basis metals.

### Scope

The method is applicable only for measurements on reasonably flat specimens. In the case of nickel coatings on non-magnetic substrates, the preferred method is that specified in AS 2331.1.4 or in ISO 2361.

Note: Factors relating to measuring accuracy are given in Appendix A.

For assistance with locating previous versions, please contact the information provider.

### Notes/comments

Standard was reconfirmed on 20 March 2017
