AS 2614-1998 (R2016) Copper and copper alloys - Sampling for chemical and spectrochemical analysis, and physical testing

[View on Information Provider website](#)

Abbreviation

AS 2614-1998 (R2016)

Valid from

05/09/1998

Information provider

SAI Global

Author

Standards Australia

Information type

Australian Standard

Format

PDF

Cited By

[This resource is cited by 1 document \(show Citations\)](#)

Description

This Standard sets out methods for obtaining a representative sample of copper and copper alloys and procedures for the preparation of laboratory samples required for the determination of their chemical composition by both chemical and spectrochemical analysis.

The samples are taken either from molten metal, cathode, cast forms or wrought product.

This Standard is also suitable for sampling copper and copper alloys for selective physical tests.

For assistance with locating previous versions, please contact the information provider.
