Description

This Standard provides listings of designations and chemical composition limits of copper and copper alloys in general use in Australia.

It includes refinery products, wrought products, ingot and cast products. Copper and copper alloy products used for the conveyance of drinking (potable) water and waste water may be subject to specific requirements as specified in relevant product Standards or specifications.

An appendix matches the designations with other common designations used internationally including those in ISO Standards.

Scope

Note:

1. Related designations to compositions listed in this Standard are given in Appendix A.
2. Copper and copper alloy products used for the conveyance of drinking (potable) water and waste water may be subject to specific requirements as specified in relevant product Standards or specifications

For assistance with locating previous versions, please contact the information provider.

Notes/comments

This Standard is referenced by AS/NZS 1546.1:2008 in regard to septic tanks.
