Description

This Standard specifies the dimensions, thread forms, lead types, mechanical properties and performance and working requirements for self-drilling screws intended for drilling and tapping into steel and fixing to timber.

Scope

This Standard specifies the general requirements and mechanical properties for the following types of self-drilling screws used in the building and construction industries:

- a) Screws for drilling and tapping into layered or unlayered steel of 0.9 mm minimum total thickness.
- b) Screws for drilling and tapping into timber.
- c) Screws for fixing plasterboard to steel with a maximum thickness of 0.8 mm.
