### Description

This Standard sets out minimum requirements for the design and construction of concrete building structures and members that contain reinforcing steel or tendons, or both.

It also sets out minimum requirements for plain concrete pedestals and footings.

### Scope

The general principles of concrete design and construction and the criteria embodied in this Standard may be appropriate for concrete structures other than buildings, members not specifically mentioned herein and to materials outside the limits given in Clause 1.1.2.

It is intended that the design of a structure or member to which this Standard applies be carried out by, or under the supervision of, a suitably experienced and competent person.

For guidance on the design of maritime structures, refer to AS 4997.

This Standard is not intended to apply to the design of mass concrete structures.

For assistance with locating previous versions, please contact the information provider.

#### Notes/comments

In Standard AS 1657-2013, AS 3600-2009 is referenced in regard to fixed platforms, walkways, stairways and ladders.
