Description

This Supplement provides additional information and worked samples on AS 3610:1995.

AS 3610:1995 sets out requirements for the design, fabrication, erection and stripping of formwork, as well as the specification, evaluation and repair of the quality of the formed concrete surface and the influence of this activity on the design and construction of an in situ concrete structure.

For assistance with locating previous versions, please contact the information provider.
