Description

This Report was prepared by Australian members of the Joint Standards Australia/Standards New Zealand Committee CH-003, Paints and Related Materials, as a quality control record of conditions and results when applying protective coatings,

Scope

The Report is suitable for use by paint applicators, coating suppliers, inspectors, project managers and specifiers who have undertaken work in such diverse fields as mining, energy and power, water, oil and gas, transport and food.

This Report form may also be used as a quality control document to record quality control details as required by the Painting Contractors Certification Program (PCCP) and AS/NZS ISO 9000.

The Report should be used in conjunction with AS 3894.10 and AS 3894.11.

Where an identification number is not applicable, a suitable sketch or location diagram should clearly designate the area under test.

For the future assessment of performance a full coating identification and application method must be recorded.

For assistance with locating previous versions, please contact the information provider.
