Description

This Standard provides manufacturers, designers, regulatory authorities, testing laboratories and similar organizations with uniform minimum requirements for the safety, performance and use of twin wall metal flues.

Scope

These requirements cover twin wall flue and components, excluding flue cowls (refer AS4566), used for flueing gas appliances with a maximum flue gas temperature of 270°C. Flue approved in accordance with these requirements is not suitable for installation where it is inaccessible and subject to continuous condensation.

For assistance with locating previous versions, please contact the information provider.

Notes/comments

Standard reconfirmed 06 August 2017
