Description

This Standard specifies the requirements, methods of test and performance criteria for point-type, resettable flame detectors that operate using radiation from a flame for use in fire detection systems installed in buildings.

Scope

This part of AS 7240 specifies requirements, test methods and performance criteria for pointtype, resettable flame detectors that operate using radiation from a flame for use in fire detection systems installed in buildings. Additional requirements for flame detectors for use in marine applications are specified in Annex A.

This part of AS 7240 does not cover flame detectors working on different principles from those described in this document (although this part of AS 7240 can be used as guidance in assessing such products).
