Description

This Standard specifies product requirements for the purposes of quality control in manufacture and performance requirements for three classes of particleboards, i.e. standard (STD), moisture resistant (MR) and high performance (HP) particleboards.

Scope

This Interim Standard specifies the product requirements for three classes of particleboards, i.e. standard (STD), moisture resistant (MR), and high performance (HP), as classified in Clause 5.

It does not cover requirements for particleboard flooring (see Preface). This Interim Standard is equivalent to the industrial Standard harmonized between the wood panel industries in Japan, Australia and New Zealand, known as JANS 21.
