Description

This Standard specifies the minimum requirements for the design and construction of portable metal ladders rated for industrial or domestic use.

Scope

This Standard sets out safety requirements for the design and manufacture of portable metal ladders. The Standard provides two duty ratings for industrial ladders and domestic ladders, which are assigned minimum load ratings.

It also covers single and multiple-section ladders, multipurpose ladders, combination ladders and those special-purpose ladders defined in Clause 1.6.

The Standard does not cover ladder accessories, such as ladder levellers, ladder stabilizers or stand-off devices, ladder jacks or ladder straps or hooks that may be installed on, or used in conjunction with, ladders.
