### Description

This Standard provides guidelines on products and procedures for the painting of buildings for domestic, commercial and industrial use. Discusses different material surfaces, paint products, the preparation of unpainted and repainted surfaces and gives recommendations for painting systems for new and maintenance work.

Includes recommendations for some specialized service applications, guidelines on the preparation of a paint system specification and discusses inspection and testing protocols.

The Standard does not include specific recommendations for the long-term protection of iron or steel exposed directly to the atmosphere or to internal climates likely to have aggressive environments which are dealt with in AS/NZS 2312.

For assistance with locating previous versions, please contact the information provider.

### Notes/comments
