#### Description

This Standard specifies essential safety requirements for approval and test purposes for miniature overcurrent circuit-breakers.

It is intended to be read in conjunction with AS/NZS 3100.

#### Scope

This Standard applies to miniature overcurrent air-break circuit-breakers, referred to hereinafter as circuit-breaker(s), having the following characteristics:

- (a) Intended for the prevention of continued overloading of electrical circuit wiring;
- (b) Having current ratings up to, and including, 125 A;
- (c) Having current breaking capacities up to, and including, 10 kA; and
- (d) Intended for use at low voltage.

A circuit-breaker intended only for the protection of electrical equipment as distinct from circuit wiring, and that is appropriately marked as such, is not within the scope of this Standard.
