### Description

This Standard sets out the requirements for plugs and socket-outlets, cable couplers and appliance couplers for operation at 50 Hz, with a rated voltage not exceeding 660 V and a rated current not exceeding 315 A, primarily intended for general industrial use, either indoors or outdoors.

It is intended to be read in conjunction with AS/NZS 3100.

For assistance with locating previous versions, please contact the information provider.
